2. Pricing for development work

£1,250 per day

3. Pricing for Facewatch facial recognition crime prevention system if used by police and connected to police cameras

£2,200 per camera - annual license, minimum term 3 years

Client to provide installed cameras, Facewatch license price includes:

- Edge box hardware
- Police Watchlist system and user interface (Facewatch acting as data controllers)
- AWS hosting
- Mobile Apps and web access
- Facial recognition license

If police wish to keep the system segregated from the main Facewatch system there will be additional charges for set up (£1,250 per day) and police will need to pay for the hosting costs and management.

4. Pricing for segregated police crime prevention system powered by Facewatch cameras

The system will be provided **free of charge** for the prevention of crime

Full featured system provided to police on a segregated police AWS server of choice

Police must sign the attached ISA and commit to share images of low level/low risk criminals with Facewatch to enable businesses to prevent crime in their properties

Police may upload Subjects of Interest for Major crime, CT incidents knowing that this is completely secure and under their control as they will manage the cloud servers hosting the segregated system

Algorithmic probes from cameras sited in Facewatch Subscriber properties of all persons entering will be sent to the segregated system to compare against the police confidential watchlist.

Police will receive alerts to specified users.

Police will also have access to the main Facewatch business system to search for intelligence (eg Stop and Search, take a photo to see if individual is on Police or Business system).

Note: All prices exclusive of VAT
